## **HPC Advisory Council Announces 3<sup>rd</sup> Annual China High-Performance Computing Workshop Program**

**Sunnyvale, Calif. – Sept. 19, 2011** – The HPC Advisory Council, a leading organization for high-performance computing research, outreach and education, today announced the formation of the [HPC Advisory Council’s 3<sup>rd</sup> Annual China High-Performance Computing Workshop](#) on October 26<sup>th</sup>, 2011 in Jinan, China in conjunction with the [HPC China 2011 Conference](#). The workshop will focus on efficient high-performance computing through best practices, future system capabilities through new hardware, software and computing environments and high-performance computing user experience. The workshop will bring together system managers, researchers, developers, computational scientists and industry affiliates to discuss recent developments and future advancements in High-Performance Computing.

“We are pleased to collaborate again with HPC China for our third high-performance computing education and outreach workshop in China,” said Gilad Shainer, chairman of the HPC Advisory Council. “The HPC Advisory Council’s worldwide workshops are excellent educational opportunities for HPC and data center IT professionals who are looking to deploy or provide additional enhancements and functionality to their advanced high-performance solutions.”

For the agenda and schedule, please refer to the [workshop website](#). The workshop is free to HPC China attendees and to the HPC Advisory Council members. Registration is required and can be made at the [HPC Advisory Council China Workshop website](#).

The HPC Advisory Council 3<sup>rd</sup> Annual China Workshop is being sponsored by the following companies: AMD, DataDirect Networks, Dell, Mellanox Technologies, Microsoft, Paratera, Platform Computing and Whamcloud. Media sponsorship and coverage is being provided by ChinaByte and China Network World.

**About the HPC Advisory Council**

The HPC Advisory Council's mission is to bridge the gap between high-performance computing (HPC) use and its potential, bring the beneficial capabilities of HPC to new users for better research, education, innovation and product manufacturing, bring users the expertise needed to operate HPC systems, provide application designers with the tools needed to enable parallel computing, and to strengthen the qualification and integration of HPC system products.
